Subject: Re-Design for Sepulveda Landscape Lighting

I think we discussed the idea of re-designing the tree lighting on Sepulveda. I'd like to leave the palm tree lighting on the trunk, as it is. I'd like to remove the trunk lighting on the broad leaf trees and light the canopy instead. In an artsy way, not in an evenly spaced Xmas tree way.

Because:

1 - The existing lighting needs to be replaced; it's worn out; keeps breaking / shorting out. I think that's why we're having such a fight keeping the lights on. That also explains, I think, why some lighting appears dimmer than other lighting.

2 - Lighting the canopies seems like it would provide more light on the street.

3 - A new design would add some new pizzazz and excitement, just like re-arranging the furniture every once in awhile.

I think you said you agreed.
